

“When All Things Are Integrated You Will Be More Sustainable”.

“Permaculture is about sustainable human settlements.

It is a philosophy and an approach to land use which weaves together microclimates, annual and perennial plants, animals, soils, water management, and human needs into intricately connected, productive communities”

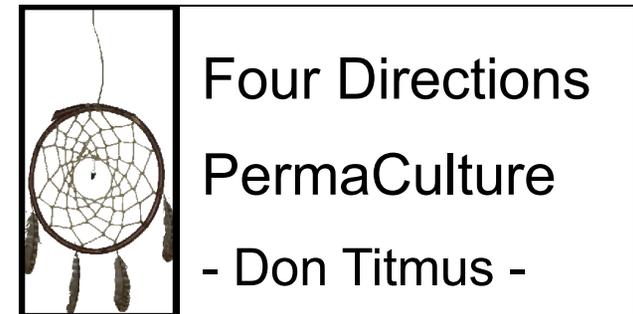

Bill Mollison

(From his “Intro to Permaculture” book)

Holistic Sustainable Design

**Consultation,
Design, &
Education.**

Planet
by the Planet.**

Designing Soul Into The Homesite

Natural Systems Analysis.

~ By studying natural patterns and function, Don can quickly resolve challenges that face many home sites.

Designing integrated and sustainable Homesites

~ Don will do a sector analysis, and complete a questionnaire. Then together with the client a design and plan of action will emerge. With this master plan of your project the process has begun.

You + Home + Land

~ As a Homesite Therapist Don will develop soul in your project, developing function and peace. It is introducing the Science of Connections and relationships that bonds you with your home and land. Don likes to call this process "Holistic Design".

~ Ideas to Implement -

- Edible/functional gardens,
- Rainwater/Greywater harvesting,
- Sm. livestock,
- Composting,
- Aquaculture,
- Passive solar applications,
- Indoor/outdoor spaces,
- Solar hot water/power,
- Dry-land restoration,
- Erosion control and more.

Don Titmus is a specialist in permaculture. A graduate of the Permaculture Design Course - 2003, and a Certified Permaculture Teacher - 2004. Then attended a second Teacher Training in 2008, to stay fresh. He also has 30 years experience in horticulture and landscaping, 15 years in organic vegetable and xeriscape gardening.

Don is always expanding his permaculture knowledge with various new projects and continuing education. The beauty of permaculture combined Don's many skills, like a web or spokes of a wheel. Don shares his knowledge through consultations and skill based classes.

The Bee Oasis

Don's Homesite, AKA The Bee Oasis, is also a demonstration/education destination. Don has regular tours and hosts classes, Always striving to BE an example of Living Sustainably.

Care of the Earth'
Care of the People
Share the Surplus

*Holistic design -
Integrating all aspects of you,
your Homesite, and your locality*

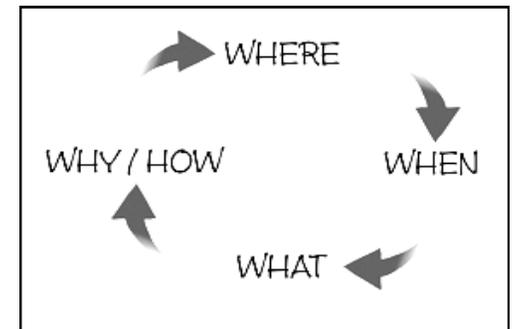

Drylands Priority One— Conserve and Hold

As a low desert eco-system, harvesting as much Rain Water as possible is the first place to start when becoming more sustainable.

Begin by storing rain water in the soil and then in containers.

All your plants will thrive and then the contained water will supply you with sufficient supplemental rain water to get you through the dry periods.
